

Legend 10™

CAD Data Migration Solution

Data migration customers require a streamlined process that will increase efficiency with minimal risk. Our years of experience working with CAD migration led to the development of Birlasoft Legend 10™ a multi-CAD bulk loading utility optimized for PTC® Windchill®. Legend 10 moves only validated data into the target system, providing greater predictability and control in a migration.

- Up to 100k CAD objects per day
- MCAD Supported by WGM
- Choose the amount of data to be migrated

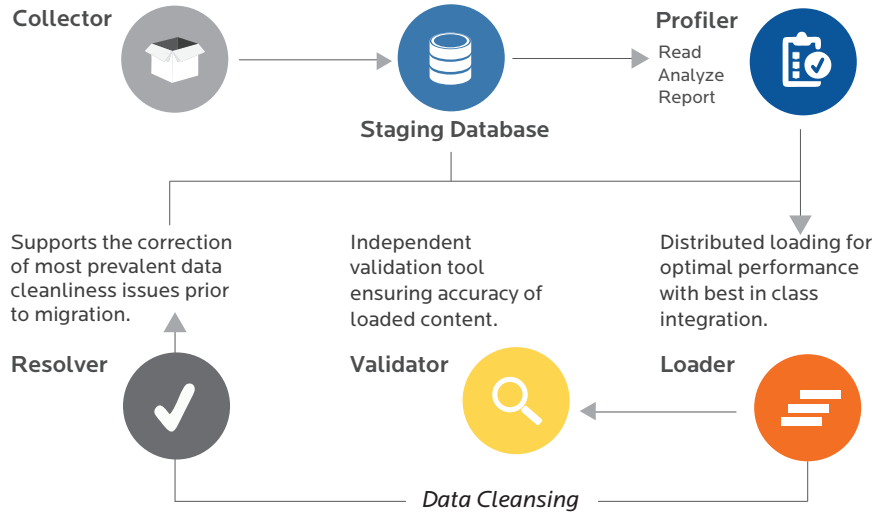

How does it work?

Legend 10 prepares content metadata, relationships and configurations for staging.

Interim location for storing and preparing data.

Determines data cleanliness and develops reports to support cleansing.

Featured Benefits

Data Quality- Validate your data quality prior to migration with cleansing and error reporting.

Performance - Load data with distributed clients up to 100k CAD objects per day.

Accuracy- Leverage your existing Windchill integrations during data load to ensure post migration quality.

Validation - Ensure CAD data migration usability with Legend 10 reporting tools.

Data History Options

Full History - All iterations of every occurrence of data

Latest Released - Latest release of each revision and latest work-in-process

Latest Only - Latest released and latest work-in-process
